Public Transportation Survey: Report of Findings

(Chinese version follows English one.)

In view that many colleagues are very concerned with the public transport to/from HKUST, in particular the frequency and waiting time, the HKUST Staff Association has conducted an online survey from 5 to 15 Feb 2016 to collect staff's feedback and comments. 705 responses were received. The results have been presented to officials of the Transport Department and Campus Services Office at the meeting on 17 Feb 2016.

Please refer to the following web page for the findings of the survey:
